About Us

**Founded in 2017 with
the goal of providing
our customers with
multifaceted alternative
energy solutions**

*Reduce your utility bills,
reduce your carbon foot-
print, and take advantage
of the renewable energy
revolution.*

HealthySun Energy Associates was founded in 2017 with the goal of providing our customers with multifaceted alternative energy solutions that meet high standards at competitive prices.

HealthySun Energy, with its trained professionals and expert analysts, specializes in Solar PV module system design, EPC, I&C, O&M Solutions, Training, and Consultations. We are determined to provide insightful, customized systems to various power requirements from residential, commercial, institutional, rural, and public sectors.

With the rapid increase in global demand for power and diminishing fossil fuel reserves and conventional resources, world countries are investing heavily in alternative energy to meet their energy needs in the future. Solar is taking center stage among alternative sources, and the Indian market appears to have a high potential for this trade, with huge power demand matching the abundant availability of solar energy all year, making solar a fast-growing industry.

The Team

Our dedicated team of engineering enthusiasts works on improving the efficiency of existing systems, exploring new products from various research papers and concepts, and converting them into consumable products.

Saleem Haris Ceo Founder

Saleem Haris is a visionary entrepreneur and the Founder and CEO of HealthySun Energy, a leading solar energy company in Tamil Nadu, India.

With over 15 years of experience in the IT industry, Saleem left his job to pursue his passion for promoting a greener environment and contribute to sustainable energy solutions. In 2017, he founded HealthySun Energy with the aim of providing affordable and accessible solar energy to communities in need. Under his leadership, the company has grown rapidly and is now recognized as one of the best in India. Saleem is driven by his ambition to make a positive impact on the world and is dedicated to providing clean and renewable energy to communities across India.

Rajesh Jagan Sales Head

Rajesh Jagan has worked with India's Major brands in power sector on Sales front. He take care of Marketing & Sales of HealthySun Energy across India

Our Vision

To become a key player in transforming our country fueled with Green Energy for a cleaner tomorrow

Our Vision

Our mission is to enable our customers self-sufficient in their power needs and optimize their power consumption

Core Values

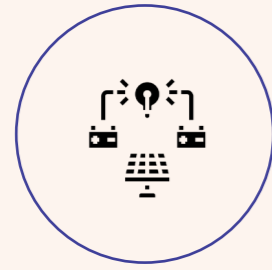

Integrity: Uphold Always
Happy Team: Happy Customers
Quality: Never Compromise
Innovation: A passion
Social Response: Part of Business

To become a key player in the state within 5 years and in the country within 10 years among the energy companies.

Our Services

High level of excellence provided in delivering reliable and efficient solar energy solutions to all our customers

Across India, we offer complete and customised solar solutions ranging from residential rooftop to utility power plant

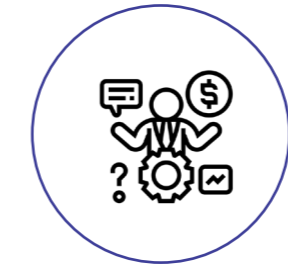

Solar EPC

We conduct extensive requirements analysis and design the ideal system. We handle precisely everything from design to reporting

Solar O&M

The expert team provides quality work and data for solar supervisory control and data acquisition (SCADA), hardware monitoring, and service.

Solar Consulting

We assist other solar players with legal and technical documents, acquisition and procurement, research and analysis, and other services.

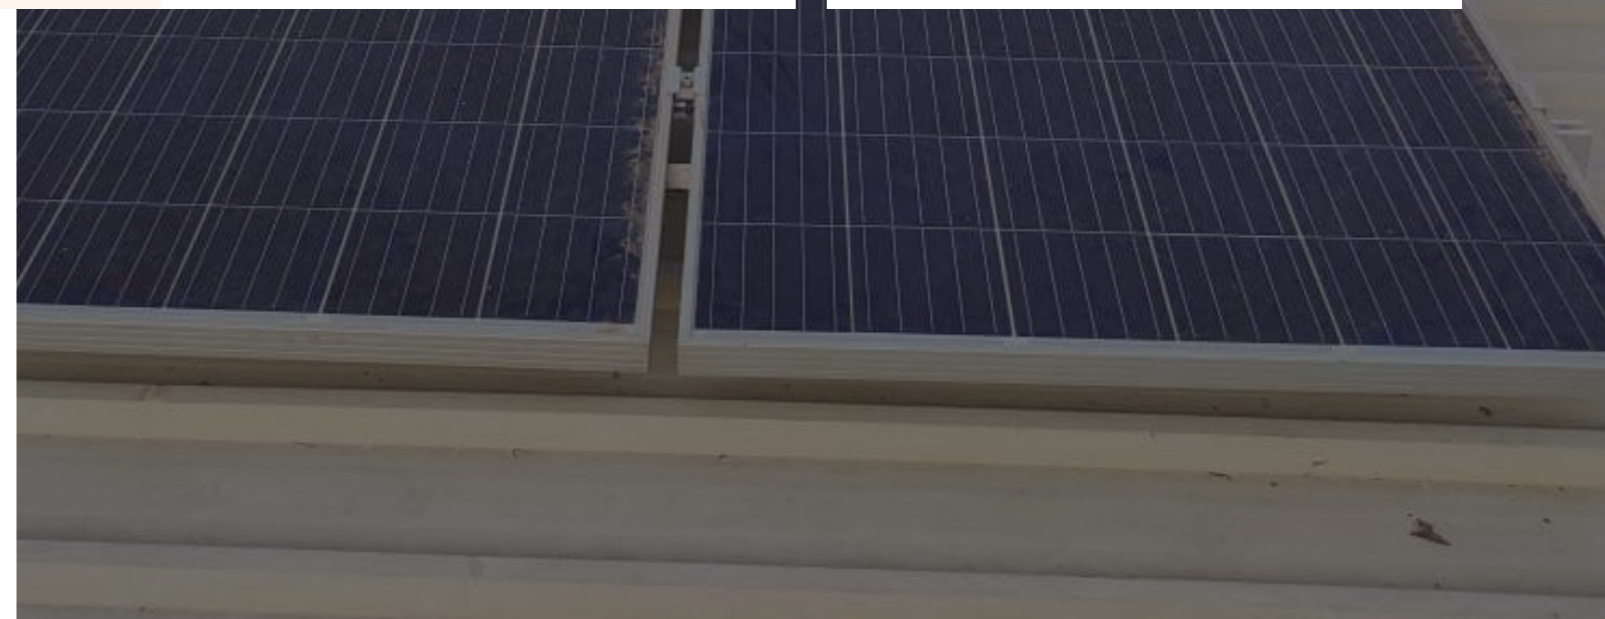

Solar Training

With classroom and field trainings, we share all of our industry experience with those who are interested, developing skilled technicians and entrepreneurs.

We take pride in our commitment to customer satisfaction as a comprehensive Solar Energy solution provider, and we believe that every property can benefit from the clean, reliable, and affordable energy provided by solar power.

HealthySun Energy encompasses customer service, such as responsiveness to inquiries, addressing concerns, and offering timely support. This establishes trust with their customers, enhance their reputation, and ultimately promote the adoption of sustainable energy solutions.

How We Work

We take pride in our commitment to providing our clients with high-quality solar energy solutions. Our expert team is committed to providing comprehensive energy services that prioritise customer satisfaction and environmental responsibility.

R&D Process

Our R&D process typically involves several stages, from initial ideation to commercialization

Sales Process

Educating potential customers on the benefits, assessing their energy requirements, providing a customised solar solution, and securing their money

Design Process

Evaluating the site conditions, designing the ideal system, creating precise technical diagrams with the appropriate components, and optimising the layout for perfect installation

Procurement Process

Best available components, across the country are sourced and connected to get delivered anytime at any location

Execution Process

To achieve the exact estimated output, well-trained professionals at each stage of the project execute the design well crafted by our engineers

Documentation Process

Legal executives will complete all necessary liaison documents and obtain all necessary safety certificates.

Evaluating current solar energy technologies, assessing market and consumer needs, and brainstorming new ideas for improving existing technology or developing entirely new solutions.

The procedure entails designing and carrying out experiments or studies to collect data and assess the feasibility of the proposed technology.

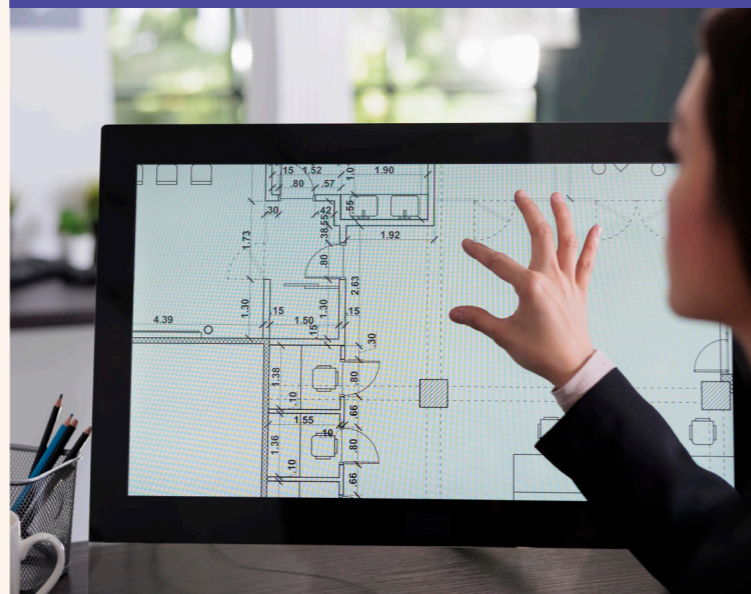

SERVICE

Our tireless support team prioritises every customer call, resolves it within 24-48 hours, and tracks it with satisfaction.

MAINTENANCE

Inspections on a regular basis to assess the condition of the modules, wiring, and other components. Continuous performance monitoring, data tracking & communication

A well-executed maintenance plan is critical for ensuring a solar energy system's long-term effectiveness and efficiency, as well as maximising its lifespan and return on investment.

We effectively manage all key areas, putting us in a strong position to succeed in the rapidly growing renewable energy industry. They can thrive in a competitive and rapidly changing market by continuously improving our products, services, and solutions, effectively communicating their value, and building strong relationships with their customers.

WHY

With our best-in-class service and customer support, we aim to be among the top players. A few highlights will keep you interested in us.

01

Proven track record

Track record of delivering high-quality solar energy solutions to our customers over 7 years. Happy Customer reviews and testimonials are keeping us encouraging

02

Customized solutions

We offer customized solar energy solutions that are tailored to the specific needs of each customer. This personalized approach ensures that customers get the best value for investment

03

The Highest Quality

Our preference of highest quality products and services ensures that our customers get a reliable and long-lasting solar energy system

04

The Best Customer Support

From the initial consultation to the final installation and beyond, we provide excellent customer service. We are always available to answer questions and provide assistance as needed. Customers will have a positive experience and be satisfied with their solar power system as a result of this.

We take pride in our commitment to customer satisfaction

05

The Best Price and Financial options

We offer the best cost in the market without compromising the quality. Affordable and reliable throughout the journey.

We give a lot of financial options through government and private sectors to ease our customer's burden

Our Projects

We have satisfied all our customers across the country and have the support and ability to work anywhere in the world and deliver

Pictures speak more words than a vocal conversation

01

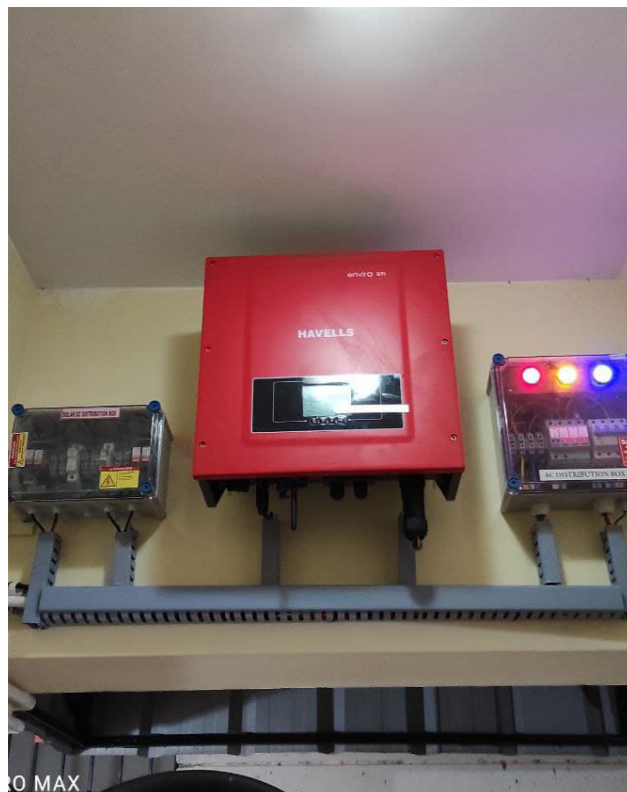

Displaying some of our successful environment saving solar projects all over India

At HealthySun Energy, we serve our customers with 100% best products and services. We never compromise on safety and security.

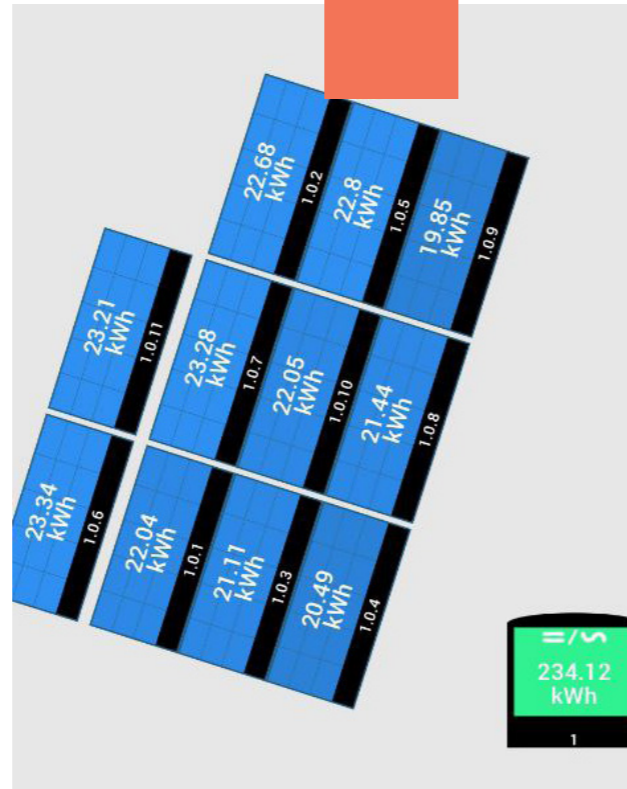

See our recent works in Residential, Commercial, Agricultural etc. to know it better

We have satisfied all our customers across the country and have the support and ability to work anywhere in the word and deliver

We have satisfied all our customers across the country and have the support and ability to work anywhere in the word and deliver
